

XML base feed now available from Ergotron!!!

Pull information from Ergotron.com and post it on your web site

Q. What is an “XML base feed”?

A. The base feed is an application interface that allows partner companies to tap into Ergotron’s product information database. With this tool, product information found on Ergotron’s web site can be transferred directly to partner web sites. This will enhance your ability to provide accurate product information, including product names, descriptions, part numbers, technical specifications and pricing information.

LX Desk Mount LCD Arm (silver)

Sleek and streamlined, the LX frees up space and allows positioning of your display for greater productivity. Reposition your LCD with just a touch. Up. Down. Forward. Back. The LX provides unparalleled range of motion.

And more ... Automatically!

Q. Can anyone use this feature?

A. Most web developers working with database-driven web sites will know what to do. By accessing this web-based service, a developer can generate an XML feed of product data—the data that is produced reflects the parameters the developer has specified in the feed. Automatic updates can be scheduled to ensure your web site contains the most current, and accurate, product information.

Q. Instead of a feed, can you provide an XML document for download?

A. Yes, absolutely. Ergotron can tailor an XML document to your needs.

If you're interested in this service, please contact Steve Adams at sadams@ergotron.com or 651-365-6669.
