

Redesign the workplace and maximise movement

ENHANCE Productivity

Employee productivity is mutually beneficial—just 10 minutes of movement can increase mental focus.

IMPROVE Mood

Happy employees foster a more positive work environment and company culture.

REDUCE Pain and discomfort

Movement-friendly workspaces can help reduce pain or reverse problems, and help others stay healthy.

Happy, healthy and productive employees

Lower absenteeism and MSDs

Our innovative and ergonomic products adapt to every workstyle, answering each individual need. By working comfortably, employees can live a healthier lifestyle, which can lower absenteeism and healthcare costs, especially related to musculoskeletal disorders (MSDs).

Professional-grade designs

Choosing a quality product that lasts longer reduces the total cost of ownership and is more sustainable. Our unrivalled quality testing supports safety for all.

Modern aesthetics

Ergotron movement solutions enhance your offices' modern look, with clean cable management and more desk space for you to work the way you want to work.

Sit-stand workstations

Our JÜV™, WorkFit® and LearnFit® products are designed to easily retrofit furniture and spaces with movement. They offer flexibility and comfort by increasing options for positioning equipment, improving workflow, boosting social interaction, and (best of all) helping people feel better.

JÜV

Exceptional ergonomics & styling

WorkFit-TL

Easy sit-stand desk conversion

LearnFit

Mobility with flexibility

Display mounts

Freely and effortlessly move up or down, tilt or pan for the best view and to improve collaboration with co-workers. With options for one, two or three monitors, employees can boost productivity with multiple screens and by freeing up workspace when not in use.

HX

Strong with premium functionality

MXV

Slim profile & rotation control

LX

Highly modular & flexible design
