

Safe and efficient vaccination processes

With COVID-19 vaccines now available around the world, Ergotron supports clinicians as they implement safe and efficient vaccination processes. Our professional-grade medical cart and charging system designs bring technology to the point of need, facilitate access to digital records and enable uninterrupted equipment runtime to maximize productivity while providing access to vaccination supplies.

ergotron®

Support accurate and efficient workflows from anywhere

Facilitate flexible temperature screening

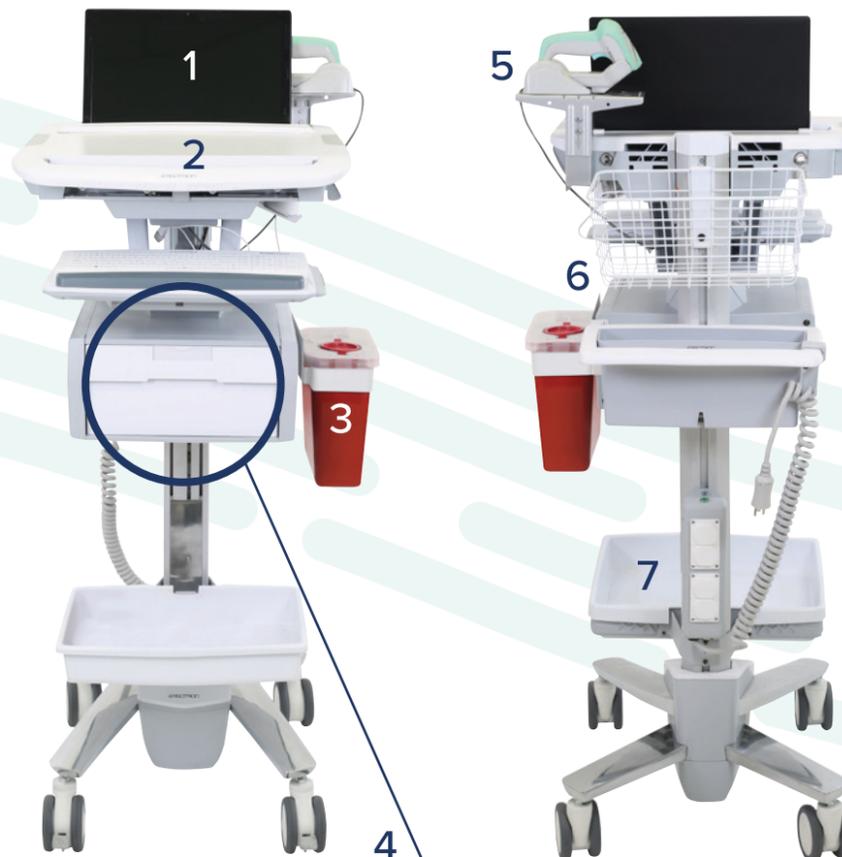

- Choose from multiple bracket options to attach your thermal imaging camera; mounts forward or backward to address privacy concerns
- Convenient sani-wipe holder supports regular disinfection
- Hot swap battery enables uninterrupted workflows
- Compact mobile cart travels to where it's needed and fits in small spaces

Camera, monitor and other equipment sold separately. Ergotron does not manufacture, sell or endorse any thermal camera.

Bring registration, digital records and accessories to the point of need

1. Enables accurate registration and digital record updates alongside the patient
2. Offers plenty of space to prepare vaccines with the large worksurface
3. Safely dispose of syringes with the sharps bracket within reach
4. Securely store syringes for use in the cart drawer

5. Support quick and accurate tracking with the scanner bracket
6. Keep other supplies easily accessible in the wire basket
7. Hold a small cooler or other supplies on the front tray

Keep your equipment charged to maximize productivity

Tablets, laptops and other mobile IT equipment are critical during the vaccination process. Ensuring an efficient workflow with powered and safely stored devices helps clinicians smoothly administer and track procedures.
